Fire extinguishers that really put out the fire!

TECHNICAL SOLUTION in low-water and waterless areas!

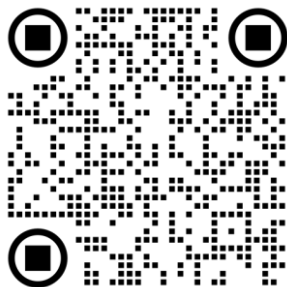

FIREMAN SF FIRE EXTINGUISHING MODULES.

The FIREMAN SF fire extinguishing module

is designed to protect industrial, household and household premises, as an autonomous or automatic means of extinguishing fires of classes A (solid combustible substances), B (liquid combustible substances), C (gases) and E (extinguishing electrical equipment under voltage up to 1000V). The modules use the patented flame retardant composition of the SFP air- dispersion mixture as a fire extinguishing agent.

Key advantages

- › The FIREMAN SF fire extinguishing Modules use the innovative fire extinguishing agent SFP as an "agent".; The fire extinguishing agent "SFP" is safe for humans. (Conclusion of the Center for Sanitary and Epidemiological Expertise of RK No. 166 dated October 29, 2010);
- › Extended service life of 10 years. Re-examination and recharge after 7 years;
- › The versatility of fire extinguishing types is basic - A: B: C: E (up to 1000V).* there is a special version for category A: E (up to 1300V). Active absorption of gorenje products;
- › No re-ignition;
- › Minimizing secondary damage from exposure to fire extinguishing agents;
- › Safe use in the presence of people indoors;
- › An environmentally friendly chemical solution of fire extinguishing liquid;
- › Operation in the temperature range: basic (from t 0°C to +50°C), frost-resistant from t+50°C to -40°C, there is a special version from t+50°C to -50°C;
- › Operation in two modes: basic - Autonomous mode; *special version - Automatic mode with forced start (electric start);
- › The possibility of integration into a previously installed fire alarm system;
- › Easy maintenance, visual inspection;
- › Mobility. It can be easily dismantled and installed in the right place during relocation or redevelopment of the facility.;
- › Different volume of the Module "FIREMAN SF": 2L. 6L. 8L. 12L. 16L.

flame retardants

Paints and formulations of the brand "Stabiterm", which we supply to the market Kazakhstan, provide a high level of flame-retardant properties of metal structures, air ducts, pipelines, cable systems, and wood.

The application work carried out by our company is carried out by professionals, on time, in compliance with all technical requirements.
